College:	SACS MAVMM Engineering College	**Degree:**	B.E. Computer Science and Engineering
Year:	3rd Year (5th Semester)	**Academic Year:**	2026-2027 (Odd Semester)
Platform:	ServiceNow (Personal Developer Instance)		

Empathy Map

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

Persona: IT Service Desk Agent

SAYS	**THINKS**
- I keep getting incidents with missing Assigned To fields **- The urgency should auto-set based on impact level** **- We need form validation to catch errors before save**	**- Why isn't there an automated way to enforce these rules?** **- Manual checks slow down my workflow significantly** **- Consistent data entry would help meet our SLA targets**
PERSONA NAME: IT Service Desk Agent (Role: Incident Handler)	
DOES	FEELS
- Manually reviews each incident for completeness - Corrects urgency values that don't match impact - Sends back incomplete tickets to the submitter	- Overwhelmed by repetitive manual validation tasks - Anxious about SLA breaches due to data errors - Hopeful that automation can reduce workload
