Date	02 October 2026
Team ID	6ab636abdcdae33acb393f Fc1
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Journey Map

Instruction: Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 (Incident Creation)	Stage 2 (Triage & Assignment)	Stage 3 (Resolution & Closure)
Actions	- Opens ServiceNow Incident form - Fills in incident details - Sets Impact value	- Reviews impact and urgency fields - Checks if Assigned To is populated - Validates data completeness	- Works on the incident - Updates work notes - Resolves and closes the ticket
Touchpoint	- ServiceNow Incident Form - Client Script (onChange) - Field validation messages	- Incident List View - UI Policy Engine - onCellEdit validation	- Incident Record Detail - Resolution Notes field - SLA tracking dashboard
Customer Thought	- Hope the form guides me correctly - What urgency should I set? - Will the system auto-fill fields?	- Is this assigned to the right person? - Are all mandatory fields complete? - Will the system prevent bad data?	- Was this resolved within SLA? - The auto-populated fields saved time - Data quality has improved
Customer Feeling	Uncertain about correct values	Confident with automated validation	Satisfied with efficient process
Process Ownership	End User / Incident Reporter	Service Desk Agent / UI Policy Engine	Assigned Technician
Opportunities	- Auto-populate urgency from impact - Show info messages for guidance - Prevent saving incomplete records	- Enforce mandatory Assigned To - Validate data on list view edits - Read-only fields to prevent errors	- Track SLA compliance - Report on data quality metrics - Feedback loop for improvements
