Date:	02 October 2026	**Team ID:**	6ab636abdcdae33acb393f Fc1
Project Name:	Implement Client Script & UI Policy	**Maximum Marks:**	5 Marks

Problem-Solution Fit

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

Box	Label	Content
1	CUSTOMER SEGMENT(S)	IT Service Desk Agents and Incident Reporters using ServiceNow
2	PROBLEMS / PAINS + FREQUENCY	Incomplete incident data (Daily); Incorrect urgency values (Frequent); Missing Assigned To for high-impact incidents (Often)
3	TRIGGERS TO ACT	SLA breaches due to poor data quality; Management escalations; Audit findings on incident data
4	EMOTIONS BEFORE / AFTER	Before: Frustrated, Overwhelmed, Anxious. After: Confident, Efficient, Relieved
5	AVAILABLE SOLUTIONS PROS & CONS	Manual review: Simple but time-consuming. Business Rules: Server-side but no immediate UI feedback. Catalog variables: Complex setup for simple validation
6	CUSTOMER LIMITATIONS	Limited JavaScript knowledge; Cannot modify server-side code; Restricted admin access on shared instances
7	BEHAVIOR + INTENSITY	Agents skip optional fields (High); Users set default values without checking (Medium); List view edits bypass form validation (High)
8	CHANNELS OF BEHAVIOR	ONLINE: ServiceNow Incident Form, List View, Mobile App. OFFLINE: Phone-based ticket creation via Service Desk
9	PROBLEM ROOT CAUSE	No client-side enforcement of business rules on the Incident form; UI does not guide users toward correct data entry
10	YOUR SOLUTION	Implement UI Policies for field control (mandatory, read-only) and Client Scripts (onChange, onSubmit, onCellEdit) for validation, auto-population, and user guidance
